MIDDLE EAST GENE THERAPY

" NK cell Therapy

new opportunity for

Covid-19 treatment "

A diagram illustrating the gene therapy process. On the left, a DNA double helix is shown. In the center, a virus vector is depicted with a healthy gene inside. On the right, a human silhouette shows the virus vector entering the body and delivering the healthy gene. Labels include 'Healthy Gene', 'Virus Vector', and 'Virus Vector with Healthy Gene'.

OUR TEAM

Our team is made up of 20 qualified members focused on gene therapy who are interested and have a good track record in this field. But beside the convergence of our team members, we have diverse skills of genetic engineering, product development, business, customer and market knowledge and pharmaceutical regulatory affairs with eagerness to constant learning.

INTRODUCTION

Middle East Gene Therapy is a high-tech company focused on immune cell and gene therapy.

We want to develop new generation of therapies such as cell & gene therapies for refractory diseases. The first project is NK-cell Therapy for get rid of Covid-19.

MISSION & VISSION

OUR MISSION IS TO INTRODUCE NOVEL AND SAFE THERAPEUTIC CELL AND GENE THERAPY PRODUCTS FOR THE PATIENTS WITH UNMET MEDICAL NEED SUCH AS CAR T CELL AND CAR NK THERAPY.

ALSO, OUR VISION IS TO STABLISH A GENE THERAPY CENTER FOR PRODUCTION OF SAFE VIRAL AND NON-VIRAL GENE THERAPIES FOR THE PATIENTS WHO SUFFER FROM THE SERIOUS ILLNESS LIKE CANCER, BLOOD DISORDER, AUTOIMMUNE DISEASES.
